

DISPOSAL OF LATEX (WATER BASED) PAINTS

To dispose of latex (water based) paint simply remove lid and let paint dry out or throw in a cheap bag of kitty litter. Once dried, remove the solidified paint from the can, throw solid paint portion into regular trash. Please try to rinse and recycle the paint can whenever possible. If you cannot recycle the can please put paint cans in a plastic garbage bag with paints lids off and dispose of in regular trash.

DISPOSAL OF OIL BASED PAINT

To dispose of oil based paint you must add kitty litter to the paint. Once the paint has absorbed the kitty litter and is no longer liquid, put paint cans with lids off in plastic garbage bag and throw in regular trash. Do not recycle oil based paint cans.
